PRO NATURE® V

Electrostatic Field Therapy

3 in 1 multifunctional high potential therapy

Heat Therapy

Optical Therapy

High Potential Therapy

Environment & Health

All living creatures in nature cannot live without living environment. People certainly need a good living environment if they want longevity.

A brisk environment provides people with fresh air and let them enjoy the kindness offered by the nature and diseases can be reduced; a harmonious environment may prevent people from being upset and keep them in a moderate and happy mood and free from stress and prolong their life.

However, the contemporary social environment is complicated. Modern people have to be confronted with various social stress and life stress such as unemployment, competition, schooling, family at any time. With the quickened life pace and increased social stress, various discomforts and diseases are following hard at heel. Some survey data from WHO show that throughout the world only 15% of the population is in good health, 15% in unhealthy status and 70% in sub-health condition. In addition, as a result of the quickened life pace and increased social stress, modern people's living standard has being improved also. As the trend of aging population become more and more conspicuous, seniors' health will also become one of the issues the society has to attach importance to. How to improve and control the attack rates of hypertension, high blood pressure, cardiovascular & cerebrovascular disease, diabetes, fatty liver, cancer, is also a problem waiting for us to solve.

Look at our living nature environment again. What is the environment of a modern metropolis like? With springing up of high buildings, crowds of buildings have surrounded our environment which has caused unbalance of the ecological environment. Waste gas, water and dregs, etc. have been continuously polluting our life space. The electromagnetic radiation of various electrical appliances, automobiles and different noises, shuttling interference of radio waves in sky, etc. have seriously damaged the nature electric field of our environment. Living in such bad environment, the human body's tissues and functions become unbalanced in potential; the physiology becomes disordered and the internal environment of the human body (the physique) is gradually acidized. "An acidic physique is the source of all diseases". Various chronic diseases and metropolitan civilization diseases come accordingly.

Being confronted with the serious social environment and nature environment, in the modern living environment with aging population and high rise of medical charge, how to maintain people's own basic health turns extraordinarily important. WHO points out that "people cannot get and retain good health until they are in quiet status in terms of health, spirit and psychology". Then, how to reach such a health status? Man should create a living environment favorable for health and longevity based on the practice and the existing conditions. To satisfy consumers' requirements, PRO NATURE® V apparatus is integrated with Electric Potential Therapy, Heat Therapy and Optical Therapy. It not only faithfully plays a role of "family doctor", but also creates a fresh and comfortable nature environment artificially by means of the up-to-date research achievement of electro-biology and enables us to do exercise while sitting.

History of Electrostatic Field Therapy

The past 30 years have seen an amount of research in the relations between electricity, electromagnetic fields and living organisms. Esteemed researchers and a multitude of respected scientists have shown that abnormal physiology is accompanied by abnormal electrical charge.

While in Western Medicine the concept of energy flow in the body has been largely forsaken, many healing traditions from around the world are based on the balance and flow of Qi.

The basic theory in these systems of healing is that illness is caused by an imbalance in the flow of energy in the body and that restoration of normal energy flow can help restore health. Our bodies are continually producing minute D.C. currents through both mechanical and chemical means. These currents follow the paths of least resistance which are in essence like an electric grid for the body. This is how for example the ECG is made possible.

One very significant effect of Electrostatic that it moves water. With our bodies being about 70% made out of water, anything that has a strong effect on water can profoundly influence the physiology

How Does Electrostatic Field Therapy works?

The pH Buffing

$$\text{pH} = -\log_{10} [\text{H}^+]$$

Life is possible only if $6.5 < \text{pH} < 8$

On humans the window is more narrow: $(7.2 < \text{pH} < 7.5)$

Health is achieved when $7.35 < \text{pH} < 7.43$

Electrostatic Field Therapy is a simple, non-invasive technique using static electricity which produces fast demonstrable clinical results.

The theory is that when an electric field with high voltage AC is applied on a human body, cells metabolism is stimulated by supplementing ions and the Acid-Base Balance of Electrolyte in blood results adjusted.

The H^+ flow of ions in the organism can optimally be directed. This is important because beside others, the coordinates of enzyme, the Ca^{++} household, the proteins of transportation in the blood and the general acid-base homeostasis depends on these flows of protons and ions.

Abnormal physiology is associated with abnormal electrical activity. Correcting the abnormal electrical activity facilitates restoration of normal physiology.

Electro Static Field Therapy apparatus apply safe levels of high AC voltage potential to the body and create an electrical field around it. This electric field stimulates the sensory receptors in the skin, which in turn stimulates the hypothalamus and other areas of the brain, to promote homeostatic functions.

Also, the electric field generates minute amounts of induced current, which permeates the body and stimulates the metabolism.

The 3 Function Mechanism of PRO NATURE® V

1. Heat Therapy :

Stimulates and massages acupoints of the feet, unblock artery and promotes blood circulation to dispel blood stasis.

2. Optical Therapy :

Use Optical Therapy for half an hour, it's like doing outdoor aerobic exercise for 3 hours continuously.

3. High Potential Therapy :

Purify the blood, activate the cell, tone the autonomic nerves.

Heat Therapy

It is universally known that every organ of the body has corresponding reflection area on foot. Therefore, feet have been considered as the second heart of the body. When some disease comes about in an organ, corresponding changes may take place on the feet, such as press ache, the color differs from the normal skin, edema, or grain of rice e.g. rough and uneven on surface.

According to chinese medicator: "blood flows when it is warm while condensates when it is cold."When blood is warm, it's heat can be transferred to various tissues and organs of the whole body so that the blood vessels expands and blood flows freely, it's elasticity is recovered and circulation can be improved.

Via far infrared ray, the Heat Therapy applies appropriate temperature on the exterior skin, which stimulates and massages the acupoints of the feet, and con-eliminates pain. It can help various diseases such as cardiovascular disease, neuropathic pain and endocrine dyscrasia.

Optical Therapy

Optical Therapy acts: 76,000Hz/second medium frequency alteration electric field (light fluctuation energy) upon the body so that the fluctuation can evenly spread to the surroundings of the body producing biological energy (electric, heat and mechanical energy) and keeps the body balance and show a vigorous status. With the alteration affect (massage) of positive and negative ions at the rate of over 70,000 times per second, the vitality of cells will be enhanced so that the body is activated; the basal metabolic rate rises; Qi and blood flows freely, the potential disease of civilization is improved, and symptoms such as pain in the loins and back, fatigue, etc. are removed. Despite from that, fat burning is accelerated, keeping fitness and good look can be realized: Optical Therapy also regulates the overall physiological function, purify blood, discharge wastes and remove poison, as well as to enhance immunity of the organism. Therefore, "using Optical Therapy function for 30 minutes is equivalent to an outdoor aerobic exercise for 3 hours."

High Potential Therapy

Under the influence of this electric fiels, extremely weak vibrations will be produced at various parts of the body. Inequilibrium at various tissues and organs will now be fully rectified. Corresponding movements with the electric field will be produced by the cells. Intercellular cohesiveness will be relieved and fluids within and without the cells, in particular the mineral ions in the fluids (potassium, sodium, phosporus, magnesium, and calcium ions) will be redistribute according to their normal values (ionic effect)

Specification of PRO NATURE® V

SPECIFICATION	PERFORMANCE
Model	PRO NATURE® V
Power Supply	240V AC~, 50Hz/60Hz
Power Consumption	120W
Input Current	0.5A
Timer	30, 60, 120 minutes
Safety Device	Timer Safe Stop Circuit
Dimension	450 x 370 x 110 mm
Weight	5 Kg
Functions	High Potential Optical Therapy Heat Therapy Leading Prong

Output Voltage

High Potential Therapy	Optical Therapy (76,000Hz)	Heat Therapy
<ul style="list-style-type: none"> • 9000V: High • 6000V: Low 	<ul style="list-style-type: none"> • 1200V: High • 950V : Low 	<p>The thermostatically control device is provided at the high gear of heat and the temperature is kept 65°C.</p>

Frequently Asked Question (FAQ)

1. Are there any side effects in using High Potential Therapeutic Apparatus?

No, there are no side effects as no medications or injections are given, but in the initial stage of using the treatment, you may experience some healing crisis. These will only be a temporary "detoxifying" response and you will soon recover.

2. What is healing crisis?

After starting the treatment and before full recovery of the illness, you may feel light headaches, heaviness, tiredness etc. These are normal detoxifying responses that will disappear soon.

3. Should I continue my medicine?

Yes, Medicine prescribed by doctors have to be continued.

4. Why is there no danger in using high potential with high voltage?

Whether electricity is safe to flow through the human body depends on current intensity. High potential therapeutic apparatus is a device with very high voltage but very small current. It only applies a high voltage electric field on the body while only less than 0.5 MA current flows through the body. Therefore, it is extremely safe. In addition, such up to date therapeutic apparatus is widely applied in households in Japan. Therefore, you can use this apparatus with ease.

5. Can we use this apparatus with rings on?

Yes, you can. It is unnecessary to take off metal articles, such as watch, ring etc. when the apparatus is turned on. However, a person equipped with pacemaker should not use this apparatus. Besides, a person with hearing aid should not use this apparatus until it is removed.

6. What should we do when lightnings occurs?

It does not matter in principle. However for the sake of safety, you may turn off the apparatus and disconnect it from the power supply like other electrical appliances.

7. Can the apparatus work together with other electric appliances?

It is easy to get the apparatus in trouble if it works together with electric blanket, electric heater. It is also possible that the apparatus cannot function properly when external electricity interferes it. However it will do no harm to our common electric appliances such as TV, refrigerator, etc.

8. Who can use this apparatus? Can pregnant woman and children use?

Generally, everybody other than those in contraindication range and children of over 3 years may use the apparatus.

9. What is sub-health? Why is the high potential therapeutic apparatus helpful to sub-health status?

Sub-health status refers to a physiologic status with the features that the organism of a person has no apparent disease through medical inspection but he feels tired and his vitality, reaction capacity and adaptation are weakened, and shows various discomforts. It is also called "the third status of the organism" or "grey status". Sub-health is between good health and disease, a status where physiological functions are weak. More than half of them will further develop to organic diseases such as high blood pressure, coronary heart disease, diabetes etc.,

Medical research proves that production of the sub-health status is related with disorderliness or micro circulation. It is mainly due to increase of blood viscosity so that the blood flow rate inside micro capillary slows down and blood cannot flow smoothly so that the nutritious substances cannot be exchanged thoroughly, the products of metabolism deposit and cannot be discharged. The results may cause various discomforts of the body and unbalance and instability in psychology.

Traditional Chinese medicator also believes that "blood flow like water is active blood; when blood cannot flow freely, it is necessary to stimulate the circulation of blood and remove stasis." Therefore, a person in sub-health status does not need to undergo medication but it is necessary to undergo prevention and cure by means of promoting blood circulation by removing blood stasis, reducing blood viscosity and improving micro circulation so as to prevent from sub-health. PRO NATURE® V has very good curative effect through the "high potential therapy" and "Heat therapy" functions. It can reduce blood stickiness and promotes blood circulation. Therefore PRO NATURE® V can improve sub-health status and prevent occurrences of diseases.

10. Why should we use High Potential Therapy?

A simple way to explain; diseases are caused by acidation of blood. In order to keep good health, it is necessary to reach three elements of good health: nutrition, rest and physical exercise. If one of the three elements has lost balance, blood will acidized and disease may form.

Today's life pace turns quicker and modern lifestyle becomes more and more disordered. e.g.: spiritual stress, unbalanced diet and insufficient physical exercise, etc. have caused formation of various modern diseases.

The initial reaction of acidized blood flowing inside the body is cause poor blood flow and may result in symptoms such as various aches and discomfort of the body. At the initial stage of such disease, many people just leaves it. As a result, the best therapeutic opportunity is lost due to delay in time and various disease are hidden inside the body. When it has accumulated to a certain stage, diseases such as cancer, cerebral apoplexy, heart disease, gallstone, gastric ulcer, cirrhosis, diabetes, hypertension, rheumatoid arthritis, etc. may occur.

By using PRO NATURE®V every day, it can effectively regulate various chronic diseases and modern diseases resulted from contamination of blood and disorderliness of autonomic nerves as well as to purify the blood every day. If blood is in a clean and balanced status, the probability of illness may reduce to extremely small or even totally none.
